

## Our new BYCA Global Safety Essentials (GSE) App is here

We are proud to announce the relaunch of BYCA's Global Safety Essentials (GSE) app which are integral to our Health and Safety strategy. These performance standards aim to eliminate high potential and high consequence incidents by nominating risk controls to mitigate our 15 critical health and safety risks.

"It is this investment of energy, passion and innovation which provides us the greatest opportunity to eliminate all high consequence incidents from our operations" - Ritchie Green, Health, Safety and Quality Director.

The implementation of our GSEs is mandatory for projects operating under BYCA's Health and Safety Management System (HSMS) as it is our paramount objective to ensure the health, safety and welfare of all persons involved in our operations.

The app is available on Google Play and Apple Store.
